PEROUZ TASLAKIAN

Research Scientist @ ServiceNow Research

Adjunct Professor @ McGill University

Associate Industry Member @ MILA – Quebec AI Institute

perouz.taslakian@mcgill.ca | Montréal, QC | www.perouz.com | perouz | perouz | LJ7gHkQAAAAJ

EDUCATION

Ph.D. in Computer Science
McGill University

Sep 2004 – Feb 2009 | Montreal, QC

Advisors: Luc Devroye and Godfried Toussaint

Thesis: *Musical Rhythms in the Euclidean Plane*

Topic: Discrete & Computational Geometry

M.Sc. in Computer Science
Concordia University

Sep 2002 – Jun 2004 | Montreal, QC

Advisors: H. Harutyunyan and T. Fevens

Thesis: *Broadcasting in Multidimensional Tori*

Topic: Message Broadcasting in Networks

B.Sc. in Computer Science
Haigazian University

Sep 1994 – Jun 1998

Beirut, Lebanon

ACADEMIC EXPERIENCE

Associate Industry Member
MILA – Quebec AI Institute

Sep 2025 – Ongoing | Montreal, QC

Adjunct Professor
McGill University

Jun 2025 – Ongoing | Montreal, QC

Assistant Professor
Program Chair – *BS in Computational Sciences*
American University of Armenia (AUA)

Jan 2012 – Sept 2015 | Yerevan, Armenia

Program Chair. I chaired the *BS in Computational Sciences* program for over two years, overseeing curriculum development, faculty hiring, and policy decisions through university-wide committees.

Research. Supervised research projects and Master's theses in algorithms and computational geometry. My publications appeared in international peer-reviewed scientific journals and conference proceedings including *Computational Geometry: Theory and Application CGTA*, *Journal of Graph Theory*, *Algorithmica*, *Journal of Computational Geometry*, *Nonlinearity*, *Lecture Notes in Computer Science*.

Teaching. Taught undergraduate and graduate courses in computer science, including *Introduction to Algorithms*, *Theory of Algorithms*, *Discrete Mathematics*, and *Capstone Preparation*.

I designed and taught all the undergraduate courses I delivered, as they were being introduced at the university for the first time. My undergraduate classes typically had around 60 students from diverse academic backgrounds. To address this variation in prior knowledge, I implemented the Mazur method of Peer Instruction in my more challenging introductory courses, such as *Introduction to Computer Science*, to foster active engagement and deeper conceptual understanding.

For all courses, I prepared comprehensive teaching materials, including lecture slides and handwritten notes, to support student learning and graded all exams. Beyond lectures, I provided individual guidance to students through office hours and discussion sessions. I was also actively involved in curriculum development, ensuring that my courses aligned with both academic and industry standards.

Industry Collaboration. Led research projects on algorithm optimization in collaboration with Mentor Graphics. The projects included balancing the stress distribution in integrated circuits and lossless compression algorithms for large-scale electronic waveforms.

Postdoctoral Researcher

Université Libre de Bruxelles (ULB)

April 2007 – Sept 2015 | Brussels, Belgium

Research. Conducted research under the supervision of Professor Stefan Langerman on problems in discrete and combinatorial geometry, focusing on routing algorithms in geometric graphs, matching geometric objects, and graph coloring. In addition, I assisted in teaching a course on data structures and algorithms.

INDUSTRY EXPERIENCE

Research Scientist / Program Lead

ServiceNow

Dec 2022 – Ongoing | Montreal, QC

Research. I lead the *Multimodal Foundation Models Research Program* within ServiceNow Research, which focuses on research innovation and academic publishing in multimodal deep neural models. The program consists of about five full-time researchers, each leading their own projects, and more than 15 interns throughout the year.

Intern Supervision. The primary objective of the group is to advance foundational research and publish in top academic conferences and journals. Many of our projects involve student interns and are conducted in collaboration with their academic supervisors at universities such as McGill and University of Montreal. These projects take place during the students' tenure at the company as visiting researchers or interns, typically lasting from eight months to a few years. As a result, many of these projects have led to publications in academic conferences and have been incorporated into students' theses.

Publishing and Patents. My recent publications focus on multimodal document understanding, efficient LLM generation, interpretable document retrieval, causal learning. These publications have appeared in conference proceedings such as NeurIPS, ICLR, ACL/EMNLP, ICML, CLeaR.

In addition to academic publishing, my research has also led to several patents, covering advancements in areas such as knowledge hypergraphs, anomaly detection, causal fault discovery, and automated style transfer in images.

Senior Research Scientist

Samsung AI Center

Jul 2021 – Nov 2022 | Montreal, QC

Research. I joined the Samsung AI Center, led by Professor Greg Dudek from McGill University, where I developed machine learning algorithms to tackle challenges in wireless communication networks. These challenges ranged from detecting anomalies in network structures to diagnosing the root causes of network events.

AI Research Scientist / Research Lead

Element AI / ServiceNow

Jun 2017 – Jul 2021 | Montreal, QC

Research. Led the *Human Decision Support Research Program* that conducts research in time-series forecasting, causal discovery and graph learning. My publications appeared in high-tier conferences such as CVPR, JMLR, CLeaR, IROS.

Intern Supervision. Supervised interns in various research projects and managed a team of research scientists.

Quantitative Strategist

Morgan Stanley

Feb 2017 – Jun 2017 | Montreal, QC

R&D. Designed and tuned complex optimization models to maximize profit margins in foreign exchange (FX) transactions.

Data Scientist

ROI Research On Investment

Sep 2015 – Feb 2017 | Montreal, QC

R&D. Developed machine learning models for data analysis and prediction in the area of economic development.

ACADEMIC SERVICE

International Collaborations

Develop a *BSc in AI* degree program for the *Foundation of Armenian Science and Technology*	2025-2026	Armenia

Organizer

Armenia LLM Summer School	2025	Armenia
New In ML Workshop at ICML	2025	Vancouver, BC
Bellairs Workshop on Causality	2025	Barbados
Armenia LLM Summer School	2024	Armenia
Bellairs Workshop on Causality	2024	Barbados
Bellairs Workshop on Causality	2023	Barbados
Workshop on Graphs, Combinatorics, Probability	2022	Armenia
Montreal All-Girl Hack Night Meetup Series	2017 – 2020	Montreal, QC
Workshop on Graphs, Combinatorics, Probability	2019	Armenia
Workshop on GroundedML at ICLR	2019	Virtual
Yerevan Computational Geometry Workshop	2012	Armenia

Program Committee Member

European Workshop on Computational Geometry	2009	Belgium
Canadian Conference on Computational Geometry	2008	Montreal, QC
Summer School on Combinatorial Optimization	2006	University of Montreal

Reviewer

Standing. NeurIPS, ICLR, WACV, ICCV
Past. CGTA, TCS, JIP, ISAAC, LATIN, CCCG, EuroCG, FUN, MTNS

Mentor

McGill AI Summer Lab	2017	Montreal, QC
WiML Workshop at NeurIPS	2024	Vancouver, BC

STUDENT & INTERN SUPERVISION

I supervise graduate students who join the company as interns, each spending about a year working on one or more research projects. In the following, I highlight interns whose research has led to academic publications.

Ongoing Intern Supervision

Xiaoqiang Wang	University of Montreal	PhD, Bang Liu
Sabyasachi Sahoo	Université Laval	PhD, Christian Gagné & Frederic Precioso

Past Supervision

Tianyu Zhang	University of Montreal	PhD, Yoshua Bengio	
Suyuchen Wang	University of Montreal	PhD, Bang Liu	
Sophie Xhonneux	University of Montreal	PhD, Gauthier Gidel and Jian Tang	
Christos Tsirigotis	University of Montreal	PhD, Aaron Courville	
Zichao Li	McGill University	PhD, Siva Reddy	
Rim Assouel	University of Montreal	PhD, Yoshua Bengio	
Farzaneh Heidari	Polytechnique Montreal	PhD, Guillaume Rabusseau	
Benoit Corsini	McGill University	PhD, Louigi Addario-Berry	Independent researcher
Bahare Fatemi	University of British Columbia	PhD, David Poole	Research Scientist at Google Research
Jonathan Pilaut	Polytechnique Montreal	PhD, Christopher Pal	Research Scientist at Wand AI
Nare Karapetyan	American Univ. of Armenia	MSc, P. Taslakian	Ass. Scientist at Woods Hole Oceanographic Inst.

TEACHING

Discrete Mathematics	**Instructor**	2015	AUA
Introduction to Algorithms	**Instructor**	2015	AUA
Theory of Algorithms (graduate)	**Instructor**	2015	AUA
Theory of Algorithms (graduate)	**Instructor**	2014	AUA
Capstone Preparation (graduate)	**Instructor**	2014	AUA
Introduction to Computer Science	**Instructor**	2013	AUA
Theory of Algorithms (graduate)	**Instructor**	2013	AUA
Capstone Preparation (graduate)	**Instructor**	2013	AUA
Theory of Algorithms (graduate)	**Instructor**	2012	AUA
Data Structures and Algorithms	**Co-instructor**	2010	ULB

INVITED TALKS AND PANELS

Vision-Language Models in the Enterpise	**CSE MRX Conference**	Mar 2026	Ottawa, ON
Building Robust VLMs for Multimodal Agents	**Rendez-Vous IA Quebec**	Nov 2025	Montreal, QC
ReTreever – Tree-based Document Organization	**MILA Community of Practice**	Oct 2025	Montreal, QC
MITACS panel on Canada's AI talent advantage	**ALL IN**	Sep 2025	Montreal, QC
Enterprise Visual Understanding with VLMs	**Yandex Hall**	Aug 2025	Armenia

Interview on Enhancing Women in IT at SSENSE	**SSENSE**	Jun 2025	Montreal, QC
Panel discussion on AI	**Global Armenian Summit**	Sep 2024	Armenia
How Do Machines Learn?	**CEGEP Students of EMSB**	Nov 2024	Montreal, QC
AI today: side effects and missing traits	**X2O Media**	Apr 2023	Montreal, QC
AI for Climate Change	**All-Girl Hack Night**	Jun 2019	Montreal, QC
Flips, Pops, and the Four Bars Problem	**Tufts University Math Colloqium**	Mar 2016	Boston, MA
Women of Computer Science	**Women in IT Conference**	May 2012	Armenia
Geometric Reconfigurations with Folds & Unfolds	**American University of Armenia**	Sep 2011	Armenia
The Geometry of Musical Rhythms	**University of Antwerp**	Mar 2010	Belgium
Geometric Properties of Musical Rhythms	**Karel de Grote-hogeschool**	Nov 2009	Belgium
Constructing Points on a Circle	**Carleton University**	Nov 2008	Ottawa, ON
Geometric Properties of Musical Rhythms	**American University of Armenia**	Jan 2008	Armenia

INTERVIEWS AND MEDIA RELATIONS
